Welcome to the World of Amiga '97

Dear Visitor,

It gives me great pleasure to once again welcome you to the World of Amiga.

Many of the accessories for the Amiga have developed a scarcity value over the last few months and I trust that the exhibition will represent a treasure house of all you have desired since the last event.

I am sure we all welcome the exciting news of the involvement of Gateway 2000 in the Amiga's future.

I am confident that our loyalty to a machine, that we would all agree, represents the best price performance ratio available, will be rewarded in the months to come.

Once again, the feel for the show is see, feel, try and buy - so please don't be shy to ask for a demonstration or even to have a go for yourself!

We trust that you will enjoy the show.

Many thanks for your continuing support.

Best regards

P. F. Brameld

The company PIOS was born out of a genuine desire to take computer technology to another level with Amiga particularly in mind. It is our belief that the PowerPC platform will allow us to carry on with the innovation that started with this machine and therefore we set about producing a machine that will allow more than one platform to enjoy its advances.

TransAM and Maxxtrem, thanks to PIOS own CHRP (Common Hardware Reference Platform) design will facilitate several operating systems run from the one machine like BeOS-1 Inux-MacOS-Windows NT and, with the help of Siamese, Amiga.

Multi processor boards (4 x 200Mhz) are planned shortly for the machines and brought courtesy of our own PIOS design team which includes Amiga guru's Dave Haynic and Andy Finkel.

Pios Computers AG

Moat Cottage
Clopton
Northampton NN14 3D2

Tel: 01832 720706
Fax: 01832 720706

The company PIOS was born out of a genuine desire to take computer technology to another level with Amiga particularly in mind. It is our belief that the PowerPC platform will allow us to carry on with the innovation that started with this machine and therefore we set about producing a machine that will allow more than one platform to enjoy its advances.

TransAM and Maxxtrem, thanks to PIOS own CHRP (Common Hardware Reference Platform) design will facilitate several operating systems run from the one machine like BeOS-1 Inux-MacOS-Windows NT and, with the help of Siamese, Amiga.

Multi processor boards (4 x 200Mhz) are planned shortly for the machines and brought courtesy of our own PIOS design team which includes Amiga guru's Dave Haynic and Andy Finkel.

Visit us on stand 108 and witness the first showing of transAM in the UK.
